TurboTender

Accelerate Procurement. **Eliminate Waste**

Who We Are

An Enterprise AI platform transforming Australian government procurement. Requirements gathering and vendor evaluation, faster, defensible, compliant. Built by procurement professionals for all Buyers and or procurement professionals.

The Problem

Reality		
68% of projects face scope creep	**42%** of departmens report evaluation bias	**300+** **hours/month** wasted clarifying requirements

Impact		
Ambiguous specs drive budget blowouts	Indefensible selection decisions	Resources exhausted on preventable rework

*Current state: Vague requirements. Subjective scoring. No audit trail.*

What We Do

Phase	Current Gap	TurboTender Solution
Requirements Gathering	Conflicting, and ummeasurable incomplete specs from scattered stakeholder input	AI-guided capture. Conflict detection. Compliance validation. Government-standard output ready for market.
Vendor Evaluation	Inconsistent criteria. Selection bias. Missing documentation.	Objective scoring matrices. Side-by-side comparison. Complete audit trail for probity.

The gap existing platforms ignore:

Most tender or procurement softwarehandle publication and contracts. TurboTender is a tool that handles the 55-75% of effort they don't, where projects succeed or fail.
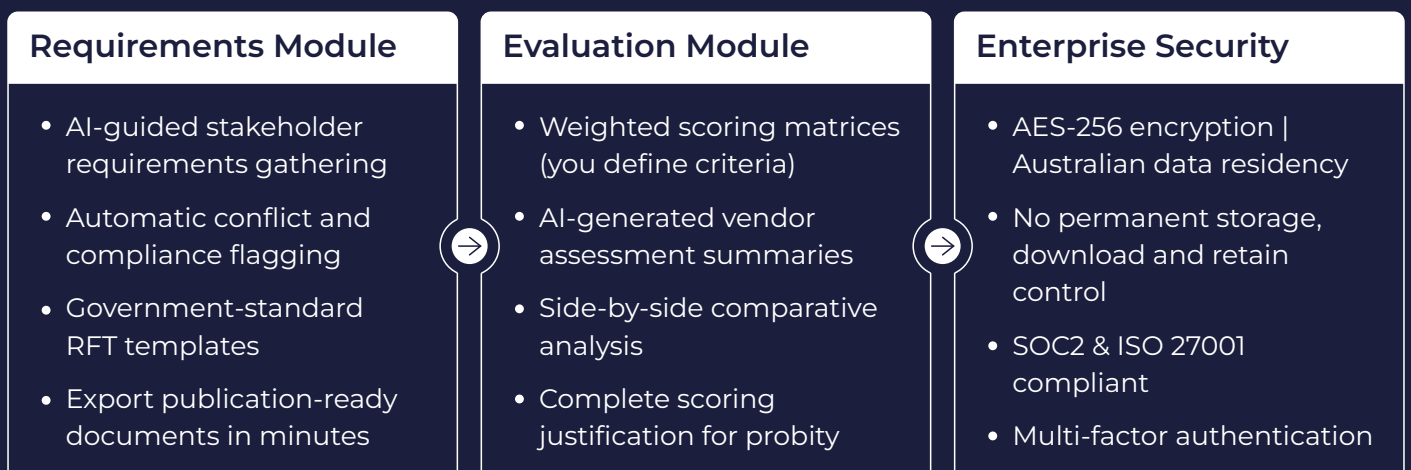

Where We Add Value

Infrastructure	ICT	Finance	Construction
Professional Services	Legal Services	Facilities Management	General Goods & Services

Every procurement category requiring RFT activity. Same core problems. TurboTender solves them all.

Why It Matters To You

Faster cycles , Requirements captured in days or weeks, not months

Defensible decisions , Every evaluation scored, documented, justified

Compliance certainty , Real-time monitoring against 47+ regulatory obligations

Resource efficiency , Eliminate consultant dependency for requirements/evaluation support

Career protection , Complete audit trail defends decisions during probity reviews

Built by Experts , Led by Anne Clay (MCIPS) and input from Australian procurement professionals

Government-Ready , MVP deployed and production-ready for immediate use

THE PLATFORM

Core Capabilities

Requirements Module

- AI-guided stakeholder requirements gathering
- Automatic conflict and compliance flagging
- Government-standard RFT templates
- Export publication-ready documents in minutes

Evaluation Module

- Weighted scoring matrices (you define criteria)
- AI-generated vendor assessment summaries
- Side-by-side comparative analysis
- Complete scoring justification for probity

Enterprise Security

- AES-256 encryption | Australian data residency
- No permanent storage, download and retain control
- SOC2 & ISO 27001 compliant
- Multi-factor authentication

The Numbers

Metric	Cycle Time Reduction	Compliance Accuracy	Evaluation Bias Reduction	Beta Testing Accuracy
Outcome	68% (months → days/weeks)	92% real-time validation	42% through objective criteria	94% across diverse scenarios

Per-Tender Pricing

Pay only for what you use. No fixed licenses. No annual commitments. No hidden fees.

Flexible options:

Single-tender trials | Volume discounts for regular users | Customised arrangements for major programs (infrastructure, Olympics, enterprise transformation)

What's included:

Full platform access | Enterprise security & compliance | Onboarding & training | Ongoing support & updates

What Early Adopters Gain

- First-mover advantage establishing procurement efficiency benchmarks
- Direct influence on feature roadmap and platform evolution
- Case study participation demonstrating measurable outcomes
- Competitive edge in demonstrating procurement governance maturity
- Volume pricing for multi-tender commitments
